SAFETY SHOULD BE TOP OF MIND WHEN PLANNING OUTDOOR HOME IMPROVEMENT PROJECTS THIS SPRING

MERRILLVILLE, Ind. – Northern Indiana Public Service Company (NIPSCO) today reminds homeowners, contractors and landscapers to keep safety a priority when planning outdoor home improvements this spring or simply enjoying the weather.

- **Call Before You Dig:** Contact the Indiana Underground Plant Protection Service (IUPPS) at 1-800-382-5544. This free service will mark the location of underground utilities. Notification should be made at least 48 hours prior to digging.
- **Heads Up:** Before climbing a ladder, look up and look out for overhead electric lines.
- **15-Foot Rule:** Keep materials, tools and all parts of your body at least 15 feet away from any overhead power lines at all times, including during the installation of antennas or satellite dishes.
- **Clear Spaces for Kites:** Never fly kites or model airplanes near power lines. If your kite does get tangled with overhead lines, don't try to get it down yourself. Contact NIPSCO for assistance and never use metallic material in a kite.
- **Inspect Power Tools:** Before or after each use, inspect power tools and electric lawn mowers for frayed power cords, broken plugs and weathered or damaged housings. Don't use damaged equipment until it has been repaired properly.
- **Hidden Power Lines:** Before trimming tree limbs and shrubs, look for power lines that could be hidden by foliage. Contact NIPSCO if there are concerns about tree limbs growing into or around overhead power lines on your property.

SAFETY TIPS FOR OUTDOOR PROJECTS

PAGE 2 OF 2

- **Pad-Mounted Transformers:** Pad-mounted transformers, which house components of an underground electrical system, should be kept free and clear of vegetation. Children should never play on or near the transformers. NIPSCO crews may need to access this equipment during unplanned outages and routine maintenance.
- **Outdoor Power Tools:** Do not use electric-powered mowers on wet grass or around water. Always use an insulated extension cord designed for outdoor use with the correct power rating for that equipment.

NIPSCO, with headquarters in Merrillville, Ind., is one of the 10 energy distribution companies of NiSource Inc. (NYSE: NI). With over 712,000 natural gas customers and 445,000 electric customers across the northern third of Indiana, NIPSCO is the largest natural gas distribution company, and the second largest electric distribution company, in the state. NiSource distribution companies serve 3.8 million natural gas and electric customers primarily in nine states. More information about NIPSCO is available at www.nipsco.com.
